

Ruby Class – WB 23.11.17

English

In English this week we have focused on reading and comprehension questions. We have also been thinking about inference, where we have children to infer based on what they have read. This is a skill we would like you to practise with your child whilst they read with you.

Maths

This week we have applying our learning from the last few weeks to answer questions about addition, subtraction and 2D shapes. Next week we will move our learning to multiplication. We will be representing a multiplication as an array.

$$3 \times 7 \quad \text{or:} \\ 7 \times 3$$

Christmas play

We have started planning our Christmas play. Soon your children will be given their part and given lines to learn. We will also let you know if you'll need to provide any kind of costume for the play.

Time to Talk

Please remember the Time to Talk sessions are intended for both parents and children to attend.

Quote of the week

Aviva Community Fund

Thank you if you voted for us in the Aviva Community Fund. Voting has now closed and we will find out on 28th November if we have made it to the finals. We'll keep you posted.
