Computing Knowledge map
Computing systems and networks

Vocabulary	
Technology	Technology is a word we use to describe all the tools and machines that people create to make life easier and better. For example, the phone you use to talk to friends, the computer for playing games, or even the TV for watching cartoons are all forms of technology.
Computer	A computer is a special machine that helps us do many different things, like playing games, watching videos, and finding information.
Mouse	A computer mouse is a small, hand-held device that helps you control the pointer on a computer screen.
Keyboard	A computer keyboard is a tool that helps you type letters, numbers, and symbols into a computer.
Double clicking	Double clicking is a computer action that involves pressing a mouse button twice quickly without moving the mouse

Skills I need:
-Identify the main parts of a computer
-Use a keyboard to type
-Turn on the computer and log on
Use a mouse in different ways - click, select and drag
-Use the keyboard to edit text and delete letters
- use technology safely
