Creating media

Vocabulary	
Paint program	A paint program is a type of software application designed to allow you to create digital artwork easily
Fill	The "fill" tool is a feature that allows users to quickly and easily colour an entire area of their drawing with a single colour.
Undo	In computer programs, the undo button lets you go back one step, erasing the last change you made
Brush Style	A brush style in a paint program refers to the various options available to simulate different painting techniques and textures when creating digital art. These brush styles can include simple lines, dots, or patterns that mimic traditional art tools like crayons, markers, and paintbrushes.
Erase	In a paint program, "erase" means to remove or delete something you've drawn or coloured on the screen.

Skills I need:

-Choose appropriate paint tools to recreate a picture

-Use freehand tools, changing the colour and brush size

-Use shape and line tools for precision, changing the size, shape and colour

-Use the undo button to correct mistakes

Use the fill tool to colour an enclosed area
